

Design: freistil Design-Team

PROFILE

TECHNICAL DESIGN

- Wooden inner frame
- Spring system: nosag spring
- Seat in polyurethane foam, "density" 37 kg/m³
- Back in polyurethane foam, "density" 28 kg/m³
- Standard foot: plastic

The data of "density" can vary in a range of +/- 10 %.

LEG VERSIONS

Plastic leg (standard foot) Tubular base frame, polished chrome

INFORMATION

- Normal-depth models and extra-depth models can be coupled together.
- Models: PB and ASE can be coupled with all other models.
- All side elements are available with piping for an additional fee.
The piping is always in the same material as the cover.
- If desired, the customer can increase the seat height by 25 mm. Seat height modules are enclosed.
- Corner groups only of ASOs always consist of models with the same orientation:
K-ASO left + K-ASO left, and K-ASO right + K-ASO right.
- The range is only suitable for velour covers to a limited extent.
The fell seams and piping can lead to lines in the pile.
- With modular systems, velour covers can lead to different pile alignments and therefore to different shine properties.
- There are more dividing seams in leather covers than in fabric covers.
Detailed information about this can be found in the info section.
- For ergonomic reasons, only the seat area of model ASS-PSZ – not the leg rest – is sprung.
So if the leg rest is used as a seat it will feel much firmer.
- In the case of groupings with different seat depths, their sitting comfort will change differently over time as a result of use:
a narrower seat depth remains firmer; a wider seat depth becomes softer.
